DETAILED ACTION

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

1. Claims 1-77 are allowed because the prior art does not teach a method of determining clock insertion delays for a microprocessor design having grid-based clock distribution, the method comprising: partitioning the complete clock net into a global clock net and a plurality of local clock nets; simulating each of the plurality of local clock nets to generate a load for each of the plurality of local clock nets on the global clock net, said simulating including measuring clock arrival time and slope at each point where a clock element is connected; simulating the global clock net based in part on the simulated load of each of the plurality of local clock nets; and combining the plurality of simulations to form a complete clock net simulation.
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
